

BENEFITS FOR COMPANIES WITH CYBER INSURANCE

IMPLEMENTING BULLWALL CAN LOWER YOUR CYBER INSURANCE PREMIUMS

With ransomware attacks increasing by more than 232% over the last four years, cyber insurers are enforcing stricter coverage requirements. Even with guidelines in place, ransomware attacks cost companies an average of \$4.62 million to recover. As more organizations seek to protect themselves with cyber insurance and payouts surge, insurance premiums are also surging. In 2022, rates increased by an average of 74%, on top of an increase of 94% in 2021.

THE BULLWALL SOLUTION

Commonly used EDR security solutions can't keep up with ever-evolving cybercriminals and attack vectors. Sooner or later, a ransomware agent will slip through.

When a ransomware attack begins, BullWall detects the abnormal file activity, stops file encryption within seconds, quarantines the infected user and protects your critical IT infrastructure and data storage – on-premises and in the cloud.

BullWall offers the only ransomware containment solution that automatically contains an attack in progress. With BullWall, your organization may also be eligible for discounted cyber liability insurance premiums.

Thanks to BullWall, our school's cyber security policy was successfully renewed, even as other schools were being dropped. It even helped us qualify for a discount.

New York University

DETECT

BullWall uses 28 sensors and machine learning to monitor file activity and identify abnormal events.

ISOLATE

BullWall stops active attacks, quarantine the infected user & device, and protects your critical IT infrastructure.

REPORT

BullWall notifies your IT team within seconds and provides a report of compromised devices and files to expedite recovery.

**NO ENCRYPTION,
NO RANSOM**

BullWall eliminates ransom demands by stopping malicious encryption in seconds.

**NO EXFILTRATION,
NO EXTORTION**

BullWall minimizes extortion and protects PII by preventing malicious data exfiltration.

**NO DOWNTIME,
NO WORRIES**

BullWall thwarts and isolates attacks before the damage can spread, so there's no downtime.

THE ONLY SOLUTION OF ITS KIND

The only solution of its kind, BullWall is agentless, lightweight, and easy to get up and running. Entirely automated, the system requires no hands-on monitoring and can be integrated with your other security solutions.

ABOUT BULLWALL

BullWall is a cybersecurity solution provider with a dedicated focus on protecting data and critical IT infrastructure during active ransomware attacks. We are able to contain both known and zero-day ransomware variants in seconds, preventing both data encryption and exfiltration.

BullWall is your last line of defense for active attacks.
